EDUCATION

Sathyabama Institute of Science and Technology

Chennai, TN

BE (Bachelor of Engineering) Computer Science Engineering (CSE) (9.04q

CGPA) Aug. 2021 – Apr 2025

Sri Chaithanya Junior College

Hyderabad, TG

Intermediate MPC (93.35%)

Jun. 2019 – May 2021

Gowtham School

Hyderabad, TG

Secondary School Of Certificate (9.7 CGPA)

Jun. 2018 – May 2019

TECHNICAL SKILLS

Programming Languages: Python, C++ ,C

Frontend: HTML,CSS,Java Script

Databases: SQLite

Other skills: AI/ML, NumPy, Pandas, GitHub

EXPERIENCE

Drobots tech private Limited (Product Developer Intern)

Jul 2023 – Aug 2023

Chennai, Tamil Nadu

- Designed and implemented an drone design for better aerodynamics
- Engaged in developing a Machine Learning algorithm for object recognition in drones especially for agricultural drones .

PROJECTS

ML algorithm for Ai avatar generator | OpenCV, GANs, Diffusion Model, DeepFaceLab, PyTorch.

- Built AI generated avatar ML model, a Machine Learning Model which trains on user's facial data and generates AI avatar based on the user's prompt.
- Enables users to create avatars that closely resemble their personality, style, or aspirations, fostering a stronger sense of identity in virtual spaces.
- Offers diverse styles and representations, enabling individuals from all backgrounds to find or create avatars they resonate with.
- Offers control over how a person presents themselves online, reducing the chances of unwanted exposure.

Text to Video generation | NLP, Stable Diffusion, GANs , VideoGPT, , Flamingo, RunwayML, PyTorch , OpenCV.

- Created a basic interface in google collab, a video generation algorithm based upon text prompt.
- Adding dynamic video responses to conversational AI systems.
- Allowing small businesses, educators, and individuals to create high-quality videos without expensive tools or expertise.
- Used privacy-preserving techniques such as differential privacy to anonymize user data.

Mental Health AI Companion App | Node JS, NLP, Logistic Regression, Wispher AI, React JS, JSON, HTML, CSS, MongoDB, Ensemble model, TF-IDF.

- Developed a web application app for analyzing user's text and audio inputs and classifying user's mental health and suggesting remedies for betterment of user's mental health in the form text and video suggestions .
- Provides users with an opportunity to seek help before mental health conditions worsen, The app is always accessible 24/7, unlike human counselors or therapists with limited working\ hours
- Offers mental health support at a fraction of the cost of traditional therapy..
- Ensures privacy, encouraging individuals who might hesitate to seek face-to-face help.
- Reduces the societal and economic impact of untreated mental health conditions.

RESEARCH AND PUBLICATIONS

ADVANCING MENTAL HEALTH SUPPORT: AN AUTOMATED CLASSIFICATION SYSTEM USING TEXT AND AUDIO INPUTS TO IDENTIFY DEPRESSION AND SUICIDAL TENDENCIES | *CONFERENCE PRESENTATION – INTERNATIONAL CONFERENCE ON MACHINE LEARNING AND SOFTWARE ENGINEERING (ICMSLE 2025)*

- Conducted in-depth research on mental health diagnostics using machine learning models.
- Developed an innovative system combining Whisper AI for audio transcription and NLP techniques for text classification.
- Utilized Logistic Regression with TF-IDF vectorization to enhance model performance and improve recall rates for critical categories such as depression and suicidal tendencies.
- Achieved improved detection accuracy, minimizing false negatives in high-risk scenarios.

ACHIEVEMENTS

-
- Served as the Class Representative for four years, where I played a key role in fostering effective communication between students and faculty, representing the interests and concerns of my peers, and ensuring a positive and inclusive learning environment.

CERTIFICATIONS

Data Processing and Visualization | *Math works*

- Learned processing of Data and visualization using Mat Lab.

Machine Learning Fundamentals | *Math works*

- Mastered supervised/unsupervised learning and built models using Scikit-learn.

Oracle Cloud Infrastructure | *Oracle university*

- Learned basics about Oracle cloud infrastructure.
